Sheep Polyclonal antibody to Bovine IgA, conjugated to FITC

Catalog Number: NB797

Host: Sheep

Research Areas: Secondary Antibodies

Specificity: By immunoelectrophoresis and ELISA this antibody reacts specifically with bovine IgA. This antibody may cross react with IgA from other species.

Conjugation: FITC

Species Reactivity: Bovine

Uses:
- IHC: use at a dilution of 1/200 - 1/2,000. ICC: use at a dilution of 1/200 - 1/2,000. Optimal dilutions should be determined by the end user.
* Other applications have not been tested.

Dilutions:
- Suggested working dilutions *
- ICC, immunohistochemistry
* Investigator should determine optimal working dilutions.

Packaging: Affinity purified Sheep antisera.

Concentration: 1 mg/ml

Buffer: phosphate buffered saline (PBS) with 0.2% BSA and 0.09% sodium azide (NaN3)

Storage: 4 - 8 °C

Notes: Antiserum was solid phase adsorbed to ensure class specificity. The antibody was isolated by affinity chromatography using antigen coupled to agarose beads and conjugated to fluorescein isothiocyanate (FITC).

Limitations: This product is for research use only and is not approved for use in humans or in clinical diagnosis. This product is guaranteed for 6 months from date of receipt.
